Noodling around in PowerShell
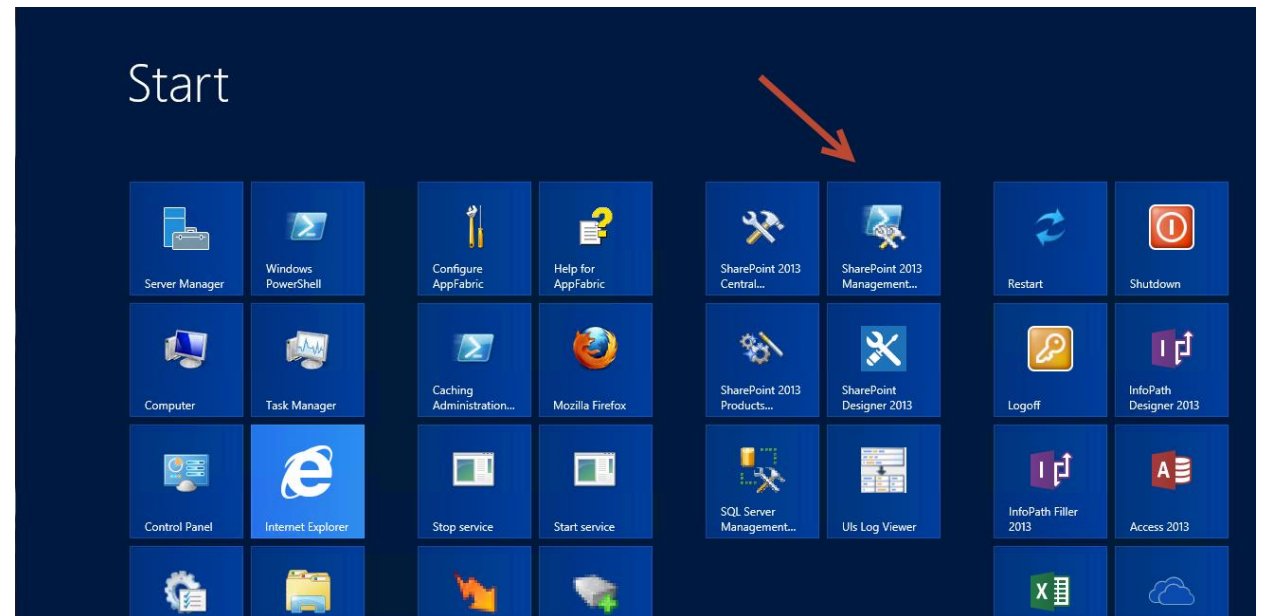

Showing off with PowerShell in SharePoint 2013

Todd Klindt
SharePoint Nerd

rackspace.®
the open cloud company

Why we should we care about PowerShell?

- Unless you like saying, "Would you like fries with that?" PowerShell is going to be an important part of your career

- It lets you do things you're already doing faster

- It lets you do things you can't do now without Visual Studio (shudder)

- It lets you do things you can only do in PowerShell (I'm looking at you Search topology)

- It's fun!

Who is this Todd guy?

- WSS MVP since 2006

- Speaker, writer, consultant, Aquarius, eater of cheese

- Personal Blog
  www.toddklindt.com/blog

- Company web site
  www.sharepoint911.com

Agenda

- Create things the hard way in PowerShell
- Export things
- Create things the easy way in PowerShell
- Create account
- Warm up app pools
- Play with Versions

- Download it all at http://www.toddklindt.com/March2013Webinar

PowerShell for Dummies

- Remember these key concepts
  - Get-command
    - Get-Command *sp*
  - help
    - help get-spsite -Examples
  - Get-member
  - Get-alias
  - Get-out

Demo

LIKE A BOSS

Summary

- PowerShell is scary
- But it's loads of fun
